

*Finally, there is a new technology that offers a simple, reliable and cost-effective solution for protecting your steam equipment against costly scale build-up.*

The NEW **ScaleX2** utilizes a new revolutionary nano-technology media for eliminating lime-scale ( $\text{CaCO}_3$ ) build-up in steam equipment. The **ScaleX2** media employs a new technique called “template-induced crystallization.” Atomic level “nano-templates” on the surface of small ceramic polymer spheres transform dissolved  $\text{CaCO}_3$  (calcium carbonate) to a crystalline form. These crystals are relatively insoluble effectively isolating the  $\text{CaCO}_3$  from anything the water comes in contact with.

**ScaleX2** does not remove calcium from water but simply prevents scale from forming in or on boilers, heating elements and probes. This economical solution fits virtually all steam equipment, and in most cases only requires once a year cartridge replacement.

Compact Size 14" Wide x 24" Tall x 5" Deep  
1/2" fnpt Inlet/Outlet, 0.75-2 gpm  
Model SX2-22  
Item No. 160-50142

## Advantages

- ❖ *Virtually Eliminates Scale Build-Up*
- ❖ *Reduces Sediment Down to 1/2 Micron*
- ❖ *Reduces Chlorine*
- ❖ *Long Lasting - One Year Between Changes*
- ❖ *Will Not Corrode or Pit Metal Components*
- ❖ *Ideal for Flash Steamers*

## Benefits

- ❖ *Greatly Reduce Service, Repair & Downtime Expense*
- ❖ *Substantially Lowers Cost of Ownership*
- ❖ *Equipment Always Operates at Peak Efficiency*
- ❖ *Extends Equipment life*

**ScaleX2 is a product developed by the**
